EDUCATION

MLRITM HYDERABAD
B.Tech in Electronics and Communication
2019-2023 | Hyd, Telangana
CGPA: 8.28

LUTHRA HIGHER SECONDARY SCHOOL
2019| Jammu, J&K
CGPA: 7.4

DELHI PUBLIC SCHOOL
2019| Bramullah, J&K
CGPA: 9.8

SKILLS

LANGUAGES

• C   • C++   • Python   • MySQL

FRAMEWORKS/LIBRARIES

• HTML • CSS • Bootstap • Javascript
• React.js

CERTIFICATIONS

- Introduction to Cybersecurity- CISCO
- Introduction to Packet Tracer- CISCO
- Programming Essentials in C- CISCO

COURSES

- Web Development Bootcamp by Angela Yu.
- Python Bootcamp by Angela Yu.
- C++ Data Structures and Algorithms by codehelp.

HOBBIES

- Hiking/Trekking.
- Football, sketching.
- Gaming.

TECHNICAL PROJECTS

PORTFOLIO WEBSITE
Using HTML, CSS, bootstrap, Javascript
- Designed a Portfolio Website.
- Used HTML, CSS ,different Bootstrap templates and javascript.

DRUM KIT
Using HTML, CSS, Javascript

- created a game in which a sound is played on click of mouse or a press of a key using CSS, HTML JavaScript learn differnt functions of EventListeners.
-

DICE GAME
Using HTML, CSS, bootstrap, Javascript

- created a dice game using CSS, HTML, JavaScript. where two dice are randomly thown the winner is compared by change in the images based on number shown.

AI BASEDCYBER THREAT DETECTION USING SIEM SYSTEM
Using python, ML, AI

- used to detect cyber threats using various machine learning and deep learning processes and a neural network approach.
- we used various Python libraries such as TensorFlow, Keras, matplotlib, tinker.
- Wecompared our Neural Network model with various machine learning models such as Naive Bayes, Random Forest, Decision Tree.

FAKE NEWS DETECTION USING MACHINE LEARNING
Using python, ML

- used various python libraries such as Pandas,Numpy and sklearn to detect fake news using machine learning.
- trained the data using a logistic regression model which calculates the probability of news being true or false.
